Junior High-Performance Program Plan

Badminton Australia is pleased to release a 4 year Strategic Plan (2019-2022) for its Junior High-Performance Program.

This plan has been formulated in conjunction with the recent announcement concerning an increase in funding allocation to Junior High-Performance badminton from Commonwealth Games Australia. This further supports the Sport Australia funding already allocated to the Junior High Performance Program by Badminton Australia.

The plan identifies clear strategic and performance objectives and outlines a new structure for the Junior High-Performance Program over the next four years.

Badminton Australia's primary aims for its Junior High-Performance Program are to establish a more transparent structure and pathway for talented junior players and to offer greater support and opportunity to assist those players with their development.
